Targeting a Senior Automation Tester / Senior QA Automation Engineer role build scalable test automation solutions, improve testing efficiency and strengthen software quality. Looking to contribute as a hands-on automation specialist while taking greater ownership of framework development, test strategy and continuous quality improvement.

Profile Summary

- QA & Automation Professional with 8+ years of experience** in Software Quality Assurance, spanning 5+ years in test automation and 3 years in manual testing across Government, Banking, and Insurance domains, with strong expertise in Agile/Scrum delivery.
- Currently working as an Automation Test Engineer within **Agile/Scrum teams**, functioning as an individual contributor and **designing, developing, executing, debugging and maintaining automated test scripts** for web applications using **Java, Selenium WebDriver, TestNG and BDD Cucumber**.
- Received the KTA Award from National Informatics Enterprise**, a Central Government organization, in recognition of contribution and performance at **Zensar Technologies Limited**.
- Proficient in Java, Selenium WebDriver, TestNG, POM, Cucumber BDD, RestAssured, Postman, Maven, Jenkins, SQL Server, JIRA, and CI/CD, with experience designing, developing, debugging, and maintaining reusable automation frameworks & test scripts.
- Experienced in functional, regression, smoke, sanity, system, integration, API, database, retesting, and cross-browser testing, along with defect management, root cause analysis, test documentation, and release quality.
- Leveraged GitHub Copilot and Cursor AI across projects including RiskConnect and the PAVITRA teacher recruitment portal.

Core Competencies

Test Automation & Framework Development	Selenium WebDriver & Java	Defect Management & Root Cause Analysis
Functional, Regression & System Testing	API Testing & Automation	Test Planning, Execution & Quality Assurance
BDD, Cucumber & Page Object Model (POM)	CI/CD, Maven & Jenkins	Agile/Scrum & Release Quality Management

Technical Skills

Category	Tools & Technologies
Core Expertise	QA Automation Engineer, Senior QA Engineer, SDET, Software Testing, Test Automation, Manual Testing
Languages	Java, HTML, SQL
Automation Testing	Selenium WebDriver, TestNG, Page Object Model (POM), Cucumber BDD
API Testing & Automation	Postman, RestAssured, API Automation
Build & CI/CD	Maven, Jenkins, CI/CD
Testing	Functional, Regression, Smoke, Sanity, System, Integration, API, Database, Retesting, Cross-Browser
Databases	SQL Server
Project & Defect Management	JIRA
AI Tools	GitHub Copilot, Cursor AI
Methodologies & Practices	Agile, Scrum, SDLC
Operating Systems	Windows

Work Experience

Zensar Technologies Limited, Pune | Sr. Software Engineer | May 2024 – Present
Domain: Banking & Insurance.

- Developing and maintaining scalable Selenium-based automation frameworks using **Page Object Model (POM), reusable Page Objects, generic methods and framework-level utilities**, improving maintainability, reducing script duplication and enabling other team members to leverage common components.
- Designing, creating and executing automated test cases covering **functional, regression, smoke and sanity testing**, enhancing test coverage and improving testing efficiency while reducing dependence on manual testing.
- Integrating automation scripts with Jenkins and CI/CD pipelines**, enabling automated test execution following code deployments, generating test reports and delivering pass/fail execution results through email notifications.
- Analyzing automation execution results and failed test cases**, rerunning test suites where required, debugging failures, identifying defects and collaborating with developers and senior team members for troubleshooting, resolution and escalation.

- Logging and tracking defects and collaborating with developers to troubleshoot & resolve issues, ensuring effective defect closure and software quality.
- Participating in requirement analysis, sprint planning and test estimation activities, contributing to test planning and delivery within Agile/Scrum environments.
- **Working as an individual contributor within the QA team**, developing reusable automation components and supporting team members in leveraging common framework capabilities.

Synechrone Technologies Pvt. Ltd., Pune | Senior Associate Quality Control | July 2022 – May 2023

- Worked as an Automation Test Engineer within Agile/Scrum teams, responsible for designing, developing, & maintaining automated test scripts.
- Developed & maintained automation frameworks using Java, Selenium WebDriver, & BDD Cucumber for the RiskConnect department.
- Executed functional, regression, and system testing for web applications, supporting continuous quality improvement and reliable application releases.
- **Designed and executed test cases, proactively identified defects** contributed to improved defect detection and testing efficiency.

Iris Software Technologies Private Limited | Senior Engineer – Quality Engineering | March 2022 – July 2022

- Executed quality engineering and software testing activities within an Agile environment, with a focus on test automation and application quality.
- **Contributed to automated test execution, defect identification, and quality improvement initiatives**, supporting reliable and efficient software delivery.

National Informatics Centre, Pune | Software Developer | October 2016 – March 2022

- Performed software testing for web applications, including functional, regression, retesting, integration, API, database, system, and cross-browser testing to ensure stable and high-quality releases.
- Contributed to the **PAVITRA Portal**, an online teacher recruitment platform developed for the **Education Department of Maharashtra**, supporting the digitalization of the recruitment process.
- **Tested key portal functionalities** including applicant registration, profile creation and completion, and application submission based on matching candidate profiles with educational institutions.
- **Developed and executed test scenarios and cases** using **Selenium and Java**, with **SQL Server** for database validation and **Windows** as the operating environment.
- **Performed end-to-end validation** across application, API, and database layers to identify defects and ensure functional accuracy.
- **Used JIRA** for project and defect management, and leveraged **AI-assisted development and testing tools, including Cursor and GitHub Copilot**, to improve productivity and testing efficiency.

Education

- Master of Science, Computer Science, Padmshri Vikhe Patil College, Pravaranagar, Ahilyanagar, 2012
